## Coventry School Partnership: Covid19 Operational Risk Assessment – March 2021

### 1. Introduction:

Coventry's Partnership of schools agreed a collaborative and consistent approach to secure the safe re-opening of schools across the City as set out in 'Coventry Schools Covid-19 Re-set and Recovery Plan' in May 2020. On 2<sup>nd</sup> July 2020 guidance for the full reopening of schools to all pupils from September 2020 was published. This was revised on 22<sup>nd</sup> February 2021: [Schools Coronavirus Operational Guidance February 2021 full re-opening](#) [Guidance-for-full-opening-special-schools-and-other-specialist-settings](#)

*These changes are fully reflected in this guidance and risk assessment.*

In preparing and reviewing this guidance the Local Authority has had regard to advice from both the Health and Safety Executive and Government. It has noted that the Government has made explicit within the guidance those actions that are statutory, those actions that MUST be undertaken (Public Health Advice) and those that are advisory (for consideration) if it is reasonably practicable to do so.

It is made clear that Government advice "does not supersede any legal obligations relating to health and safety, employment or equalities and it is important that as an employer you continue to comply with your existing obligations". Consequently, Health and Safety Legislation continues to take precedence.

### This risk assessment guidance:

- Sets out the current context and statutory health and safety obligations as at March 2021
- Reflects the relevant principles set out in Coventry schools Covid-19 Re-set and Recovery Plan
- Sets the national and local context for conducting a risk assessment to reduce transmission of a disease within school
- Provides an exemplar risk assessment (revised) that can be adopted and adapted to any educational setting
- Provides a template to record a risk assessment method statement – setting out safe methods of working (control measures), which all staff should read, understand and sign
- Incorporates hyperlinks to sources of helpful information and resource

**What is the risk?** Covid19 is an infectious disease recognised internationally as a pandemic, the transmission of which must be controlled. Whilst it is reported that the impact of the virus has not changed since March 2020, increased social contacts and the new variant have combined to significantly increase transmission rates. Improved access to testing, including lateral flow tests has identified asymptomatic cases (no symptoms) within the community, that if not isolated early present a further transmission risk, which needs to be controlled as far as is practicably possible.

This risk assessment therefore continues to focus on actions that are **reasonably practicable** to implement, that will reduce the risk of transmission of Covid19 within the school community

**Who is responsible?** The employer is responsible for making sure that risks, particularly the risks to staff and pupils, are managed so far as is reasonably practicable. For maintained schools the employer is Coventry City Council, for Academies it is the Academy Trust.

Whilst it is recognised that the employer cannot delegate the overall legal accountability for the health and safety of employees; the day-to-day running of the school including responsibility for the health and safety of staff and pupils is ordinarily delegated to the head teacher and school management team.

## 2. Overview of Actions required for safe methods of working:

- Put in place sensible and proportional approaches to minimise the risk of Covid19 transmission to staff, pupils and visitors whilst in school.
- Communicate the risks and required safe methods of working to all building users and monitor compliance
- Ensure that staff (employees) have the relevant information and training to manage risks on a day to day basis, including access to competent health and safety advice where needed and that they understand their personal responsibility for their safety and the safety of others.
- Check that the control measures have been implemented and remain appropriate and effective.
- Ensure that the control measures are monitored throughout the day and reviewed where necessary.

### 2.1 Key message:

Good health and safety is about keeping things simple, being proportionate and focusing on the real (substantive) risks. Procedures should be clear and concise with assessment of risk being practical. Good leadership is about getting the balance right on managing risk rationally, it is not about trying to eliminate it altogether.

### 2.2 What leaders need to do:

- Ensure that the school is following the employer's health and safety policy and has effective arrangements for managing the health and safety risks at the school.
- Maintain effective communications with employers, governors, and the school workforce, and give clear information to pupils and visitors, including contractors, regarding any significant risks on site.
- Make sure that the staff have the appropriate training and competencies to deal with risks in their areas of responsibility.
- Consult and work with recognised TU safety representatives/employee representatives and safety committees. It is a legal requirement that employers must consult with the health and safety **representative** selected by a recognised trade union or, if there isn't one, a representative chosen by staff
- Make sure that staff understand their responsibilities and know how to access support and advice to help them manage risks responsibly.

- Provide visible leadership to the whole school so that staff feel motivated, supported and empowered to focus on the things that really matter.  
See: <https://www.hse.gov.uk/services/education/sensible-leadership/leadership-test.pdf>

### 3. Locally agreed Principles:

Coventry schools Covid-19 re-set and recovery Plan' May 2020 set out agreed principles to secure the wider reopening of schools. The following five principles remain relevant during the current period.

- The safety of everyone in school is paramount
- A consistent and co-ordinated approach and communication will be maintained across the Coventry school system
- The absolute focus on encouraging all eligible vulnerable children to return to school will be maintained alongside provision for children of critical workers
- Adherence to social distancing will be maintained as far as practicably possible in all classroom and school environments
- School organisational planning will minimise the number of pupils that each staff member has contact with

### 4. What we know:

The World Health organisation (WHO) confirms that data from published epidemiology and virologic studies provides evidence that COVID-19 is primarily transmitted directly from symptomatic people (those infected with Covid19 displaying symptoms) to others who are in close contact with the infected person. Respiratory droplets are passed on directly through coughing and sneezing, or indirectly by contact with contaminated objects and surfaces; where the virus may be transferred from the surface to the hand and then the face - eyes, nose or mouth. It is understood that people can be infectious before their illness starts. It is now evident that infection can be asymptomatic (no symptoms) thereby presenting a higher risk of unintentional transmission. Therefore, to minimise the risk of transmission, settings must put into place effective infection protection and control. Ensuring appropriate social distancing in school, meticulous hand hygiene practice all serve to reduce risk significantly.

**The hierarchy of controls:** if properly implemented will substantially reduce the risk of transmission of infection.

## These include:

### Exclusion:-

- Minimising contact with individuals who are unwell by ensuring that those who have coronavirus symptoms, or who have someone in their household who does, do not attend childcare settings, schools or colleges. Covid19 tests for symptomatic household member/s must confirm the outcome of the Covid-19 test if taken as soon as the results are known.
- Clinically vulnerable employees who are at higher risk of severe illness (for example, people with some pre-existing conditions as set out in the [staying at home and away from others \(social distancing\)](#) guidance should be supported in undertaking a Vulnerable Employee Risk Assessment (VERA) and reasonable adjustments made if necessary, which may include additional protections within the school environment or if possible working from home supporting the delivery of the curriculum for children unable to attend school as a consequence of self-isolation or local lockdown

### Hygiene:-

- A stringent cleaning regime should be in place [COVID-19: cleaning in non-healthcare settings](#). At the highest level this could follow the advice set out in: [Covid-19-decontamination-in-non-healthcare- settings](#)
- Frequent cleaning and disinfecting of objects and surfaces that are touched regularly (touch points), should be undertaken using standard cleaning products or antiseptic wipes, both of which kill the virus. This may require settings to enhance cleaning capacity. It should be recognised that cleaners and caretakers provide the frontline in protecting everyone in school, but health and safety is everyone's responsibility so cleaning tasks may be undertaken by any member of staff as appropriate.
- Socialising hygiene routines including regular hand-cleaning regimes - washing hands thoroughly for 20 seconds with running water and soap, drying them thoroughly or using alcohol hand rub or sanitiser ensuring that all parts of the hands are covered. Identify specific situations when additional handwashing is required
- Ensuring good respiratory hygiene by promoting the 'catch it, bin it, kill it' approach with follow up handwashing and cleaning/wiping of any contaminated area followed by safe disposal of waste
- Maximise natural ventilation and access to the external learning environment, whilst maintaining a comfortable working temperature within school see: [air conditioning and ventilation during the coronavirus outbreak](#)

### Social Distancing:-

- Secure social distancing whenever practicably possible, through footfall management and planned supervised movement throughout the school building
- Regulate entry so that the premises do not become overcrowded at any point and no 'pinch points' are experienced at ingress or egress
- Where it is possible to remain 2 metres apart, use floor markings/signage to mark the distance and facilitate compliance, particularly in corridors, hand cleaning areas, toilets and internal and external communal break areas

## Covid19 Operational Risk Assessment – planned re-opening of Primary Schools

- - Ensure the environment (such as classroom layout) and timetables are conducive with social distancing – remove all clutter and non-essential resources
- - Minimise social contact by forming small fixed groups of staff and children and avoiding movement between or blending of groups whenever possible
- - Where face-to-face contact is essential, this should be kept to 15 minutes or less whenever possible, contact should be side by side.
- - Social distancing is not required in an emergency situation, e.g. medical emergency, fire evacuation etc. PPE should be used in a medical emergency if time permits (a first aid supply of PPE is provided to all schools to secure an individual emergency situation, for example a sudden illness that may be Covid19 symptomatic of a child or staff member in school)

### **Lateral Flow Testing:-**

- Take active steps to identify asymptomatic cases within the school community, though the promotions of regular (at least weekly) community or on-site lateral flow testing for all staff and pupils year 7 and above, adhering to the [Mass asymptomatic testing: schools and colleges](#) safe operating procedures if based in school.

## **5. Summary:**

These underlying principles are the key focus for organising all aspects of the school day and need to be built into the operational routine. A model Covid19 operational risk assessment was developed for City-wide use, which is pre-populated with generic safe methods of working. It was advised that if adopted, it would need to be adapted to each specific setting. The risk assessment template has been reviewed to reflect the changes in risk and necessary controls from September 2020 when all pupils return to school on a full-time basis, the Lockdown of January 2021 and the full reopening from 8<sup>th</sup> MARCH 2021. In addition to infection control, the risk assessment template and supporting resources extends to support additional health and safety considerations related to the consequences of Covid19 specifically:

- Securing provision for SEN – from September 2020 the provisions in a child’s Education, Health and Care Plan must be delivered. This means that peripatetic support teachers and health therapists will be able to work within schools, by adhering to the schools visitors policy thereby balancing the risk of allowing external visitors into school with the duty of best endeavours to provide (school may adopt the LAs model policy for visiting professionals).
- Health and safety audit of the school building checklist – for use by class teachers (HSE) to ensure that the overall building is safe to use in terms of trips, falls, lighting, electricity hazards etc.
- Staff audit and recovery plans for absence of leadership, teachers, non-teaching staff, cleaners, first-aiders and DSL and response to local lockdown
- Maintaining communications with parents, staff, visitors and the general public
- Supporting the mental health and well-being of everyone in school
- Developing a recovery curriculum
- Developing a contingency plan to secure flexible support for home schooling, if a need arises as a consequence of group isolation, whole school isolation or local lockdown.

## 6. Overview of Statutory Requirements - What you must do in law:

Source: [Guidance-for-full-opening-special-schools-and-other-specialist-settings](#) )

### Prevention:

You **must** always:-

- 1) Minimise contact with individuals who are required to self-isolate by ensuring they do not attend the school.
- 2) Ensure face coverings are used in recommended circumstances.
- 3) Ensure everyone is advised to clean their hands thoroughly and more often than usual.
- 4) Ensure good respiratory hygiene for everyone by promoting the 'catch it, bin it, kill it' approach.
- 5) Maintain enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as detergents.
- 6) Consider how to minimise contact across the site and maintain social distancing wherever possible.
- 7) Keep occupied spaces well ventilated.

### In specific circumstances:

- 8) Ensure individuals wear the appropriate personal protective equipment (PPE) where necessary.
- 9) Promote and engage in asymptomatic testing, where available.

### Response to any infection

You **must** always:

- 10) Promote and engage with the NHS Test and Trace process.
- 11) Manage and report confirmed cases of coronavirus (COVID-19) amongst the school community.
- 12) Contain any outbreak by following local health protection team advice

## Model COVID-19: Operational risk assessment for school reopening

**Please note: this risk assessment should be undertaken in conjunction with the covering guidance which absorbs statutory requirements and Government guidance available as at 2<sup>nd</sup> July 2020. Control measures have been used to exemplify actions that could be taken to mitigate the risk, which you can use or change. Please add additional Activity (risks) as deemed necessary and delete any activity that does not apply to your school. The table is designed to enable you to re-order risks/priorities as required.**
